Millennium - A New Hope is a story of a world divided between the rich and the poor, with the poor being left to fend for themselves. Most have grudgingly accepted their fate, but young Marine, after her father is left for dead by the soldiers of the rich, gets inspiration from the animals and begins a crusade to save her people.

Why I liked the game:

Lots of secrets - exploration is rewarded

An engaging and meaningful story

Fun and unique characters

Various levels of difficulty

Option to have visible or random encounters

Lots of side-quests, some easy and some very hard. BEEP is a cheap and simple but nevertheless entertaining adventure/platformer/puzzle game. Even though it has some challenge to it, it's a truly relaxing experience with a lot of options for creative gameplay and experiments. The game is great in showing you that having some simplistic physics and ability to experiment with it can turn even a simple concept into a really fun and even somewhat addicting game. And for those of you who bought this game from one of those sales dirt cheap (just like me) - give it a try, it's definitely worth it! :). For some reason, the incompetent employees over at Paradox decided to disable achievements if you so much as want to change a ruler's name, before starting a game. I don't see how customizing a name or changing a flag can affect your gameplay, but apparently Paradox is too much out of the loop with its own players, to care.

TLDR: Using the Ruler Designer disables achievements.. Can't resist supporting this game & Dev!

Nice campaign to play through if you like the original game, good challenges, don't hesitate to get if you are here you know you like this game.. Why haven't you bought it yet?. If this dev. would finish "THE LITTLE CRANE THAT COULD" first because I think it has so much potential, maybe this would not be a cash grab currently? I cannot recommend until this dev. finishes his first potential product.. This game is ridiculously bad. Glitchy and slow paced. The game does not save. Oh, and if you die, you have to start from the very beginning. Are you kidding me? What is this 1995? What a waste of money. Mind you, I played on Nightmare difficulty and was bored out of my mind.. This is another nice little HOG puzzle game from Big Fish. Good artwork from Blue Tea although maybe not the best resolution - it'd probably look better on a tablet than a large monitor. The puzzles were not too challenging, the hidden object scenes were well drawn and decent although again, not so tough that I had to skip any. The level of challenge I think is good for a game like this - not so easy that you blow through everything in seconds but not so challenging you want to quit. Playing without hints and clues where to go it was still fairly easy to see what the next step to do was or what area to go to next. I think it's a decent game for a breather, just something to pull up and casually relax with. The bonus story homage to the Blue Beard opera was also kind of cute although a lot shorter than I was expecting. All in all though, a nice looking game with some nice hidden object screens and some decent puzzles.. While the original Runaway was just mediocre, this sequel Runaway: The Dream of the Turtle is incredibly worse. The main character is an idiot, the story is awful and it gets worse as it progresses. The game becomes an endurance test, like a real bad movie that you foolishly decide to see to

the end just because you already started watching it. Avoid this game.. Game Link:

Ive been waiting for this game for so long! For me this game is acutally ok i had fun playing it i didnt really see any flaws really...i didnt get any bugs or anything like that. i think the gameplay is different i do wish it was longer but besides that i do recommend this game. Check out my gameplay. I think by the end of the day i will have the good ending up on my channel. SO keep checking :)

Great puzzle-like tight skill-game!. A great blend of adventure and atmosphere. The level design, the world building, the mechanics, everything is extremely polished and adds up to way more than the low price suggests. An easy recommendation for pretty much everyone.. A true Knights Tale, gg!. This game was worth the little effort and value you put into it.. Just watched a TV show using my Oculus -love that I can lay down on my couch and watch comfortably. nice that I can move the screen around without even pausing the video I'm watching. I've used Plex for years, so have been waiting for something like this. Wish it was in the Oculus store though. Absolutely. When one must go fight, one must look respectable.. This game is fantastic - by all means a hidden gem! Retro art with Dungeon Crawler + Tower Defense? Um.. Heck yeah! It's everything the trailer\screenshots tease and more. Definitely worth every penny and then some! I look forward to seeing more from this developer. :). cat notebook is... a cat notebook. It contains beautiful abstract drawings of cats, in various shapes, positions, situations... you name it. The art seems heavily inspired by the surrealist and "modernist" styles of the early 20th century; in particular, of Paul Klee's trademark style (see <https://www.wikiart.org/en/paul-klee> to compare). For the art alone, this game is revolutionary. The music is incredible too, taking the short, repeating style of Yume Nikki, and polishing it to create a totally unique auditory experience. I can confidently say that I have never played anything quite like cat notebook, and I'd recommend you buy it, simply to support more art like this. However, cat notebook has a major problem, that being walking speed. For some unknown reason, the walking speed of the player is mind-numbingly slow, and there's just no way to speed it up. I got bored by around the 3rd image, and just data-mined the game to see and hear the rest of the art. For those who don't know how to do that, go to the folder [\Users\user\Library\Application Support\Steam\steamapps\common\cat\[put space here\]notebook\Game.app\Contents\Resources\app.nw\img.](#) and upload the images to http://petschko.org/tools/mv_decrypter/ using the "En\Decrypt-Code" of [7efd9838edcfb507c6663fe35ff662f1](http://petschko.org/tools/mv_decrypter/). Yeah, it's faster to go through all that than actually explore the game. I'm hoping this will be patched soon, since otherwise cat notebook is a work of art.

[fl:dr\u2014great art, marred by bad-to-broken gameplay. I'd still recommend it though, if you're in the market for something refreshingly new.](#)
